

Azure MFA activation with mobile app

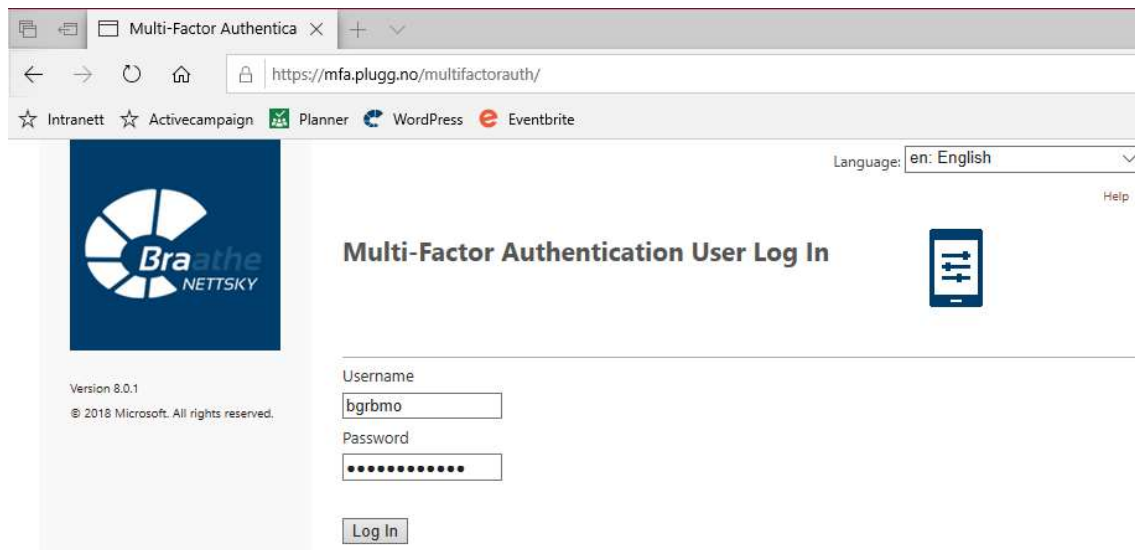

URL for MFA administration: <https://mfa.plugg.no>

Prerequisite: You need the Microsoft Authenticator app on your smart phone.

For iOS: Find Microsoft Authenticator in App Store.

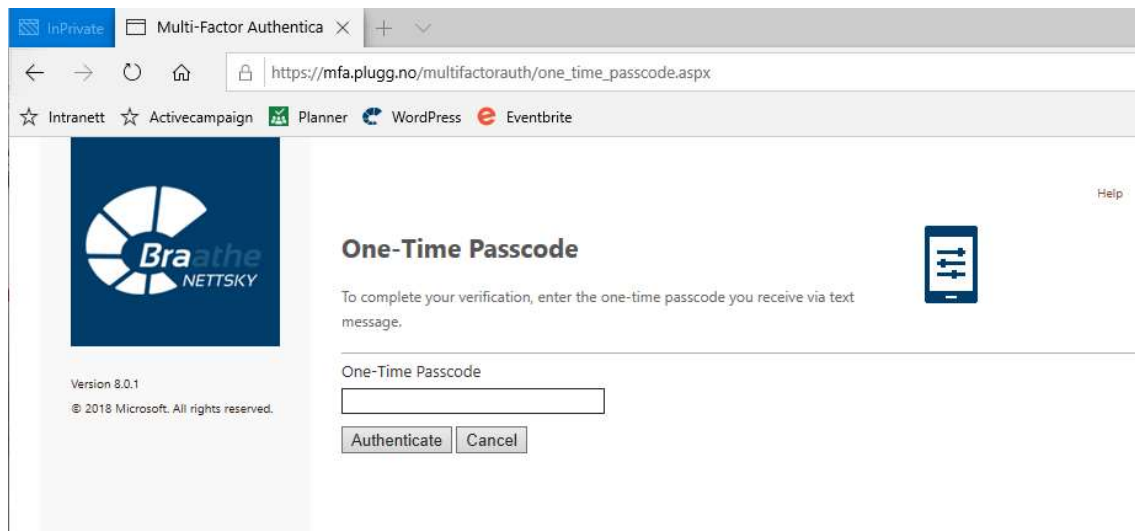

For Android: Find Microsoft Authenticator in Play Store.

- Log in with your username and password

The screenshot shows a web browser window with the URL <https://mfa.plugg.no/multifactorauth/>. The page features the Braathe NETTSKY logo on the left and a login form on the right. The form includes fields for Username (containing 'bgrbmo') and Password (masked with dots), and a 'Log In' button. A language dropdown menu is set to 'en: English'. A small icon of a smartphone with a plus sign is visible next to the title 'Multi-Factor Authentication User Log In'.

- Provide the One-Time Passcode you receive in an SMS

The screenshot shows a web browser window with the URL https://mfa.plugg.no/multifactorauth/one_time_passcode.aspx. The page features the Braathe NETTSKY logo on the left and a verification form on the right. The form includes a text input field for the One-Time Passcode and 'Authenticate' and 'Cancel' buttons. A message reads: 'To complete your verification, enter the one-time passcode you receive via text message.' A small icon of a smartphone with a plus sign is visible next to the title 'One-Time Passcode'.

- Choose «Activate Mobile app» and generate a new activation code. On your mobile, in the Microsoft Authenticator app, choose «Add account» and “Work or school account”. Scan the QR-code or manually type the code. Choose «Complete activation».

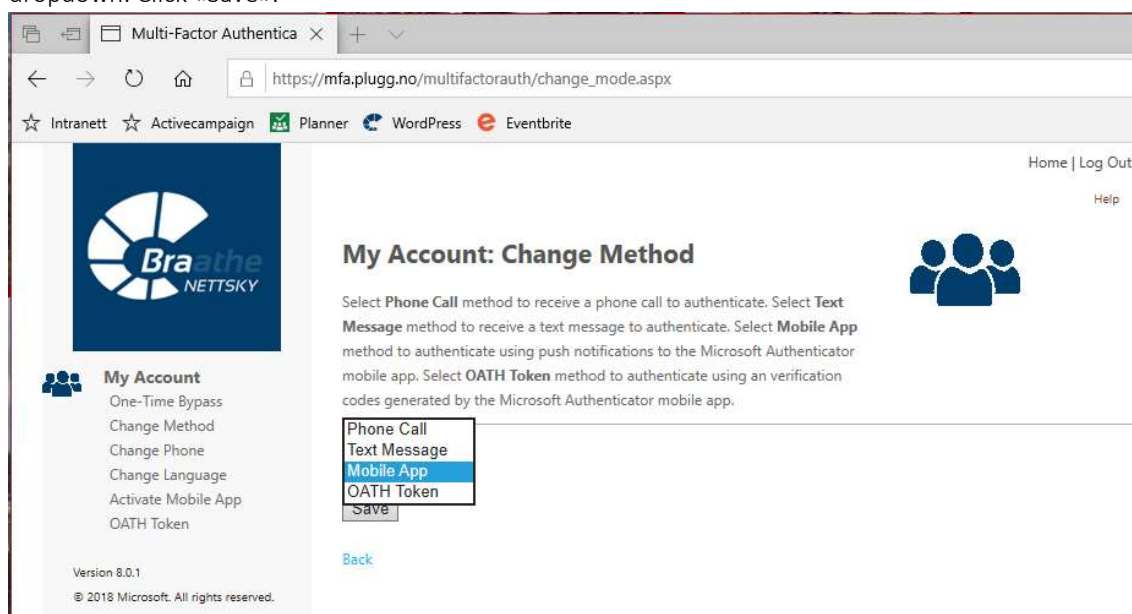

Browser: InPrivate, mfa.plugg.no, x + v
Address bar: https://mfa.plugg.no/multifactorauth/activate_phone_app.aspx

Activated Devices:

Device Name	Version	Action
Birgitte sin iPhone	6.3.29	Deactivate

Buttons: Generate Activation Code (highlighted), Back

- To change which MFA method you prefer, choose «Change Method» and «Mobile App» in the dropdown. Click «Save».

- Now, Mobile App is set as your default method for MFA, and will become applicable upon your next login which requires multifactor authentication. Logging in will send a request to your mobile app, and you will have to Approve the request in the app on the phone.
